Safer Internet Day

FEBRUARY 7, 2023

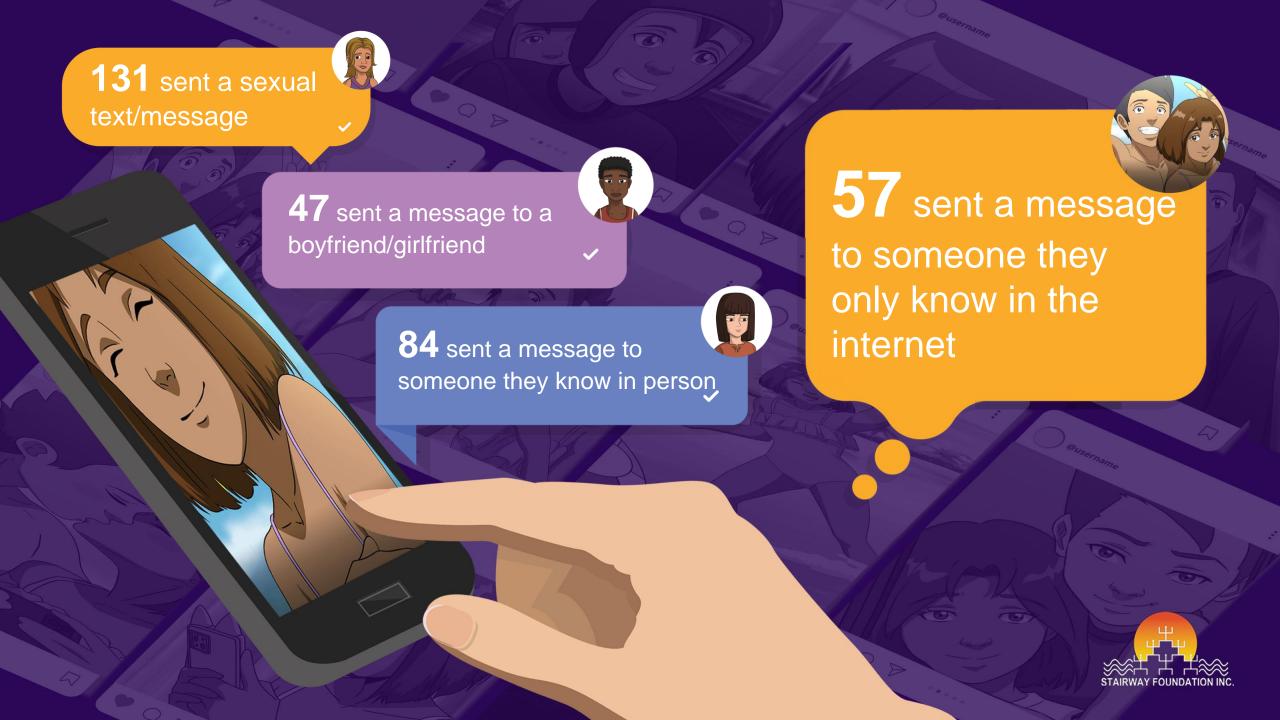

Nearly half of all students have had at least one online experience related to sexual content (text/message, image/video, voice call, video call)

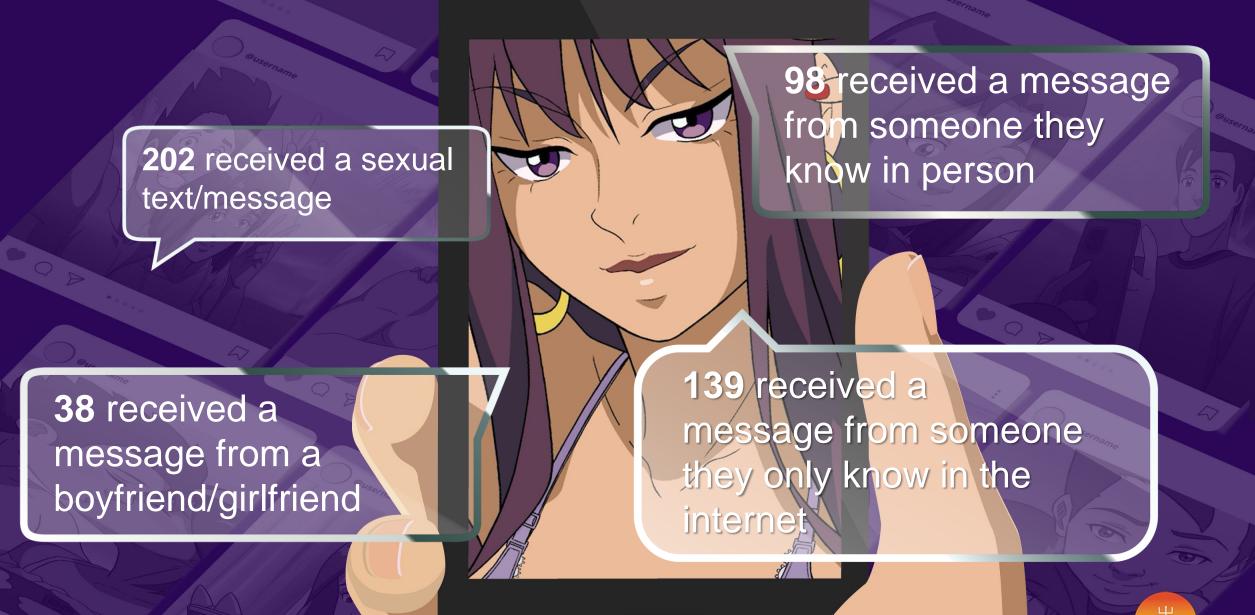

From a survey of

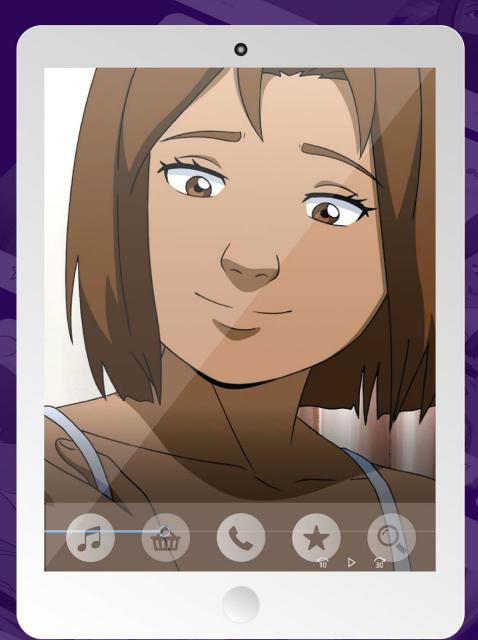

1000 STUDENTS 407 out of approximately 1000 students indicated that they had sent, posted, or streamed sexual content

258 students indicated they had received a sexual text/message or an image/video showing private body parts

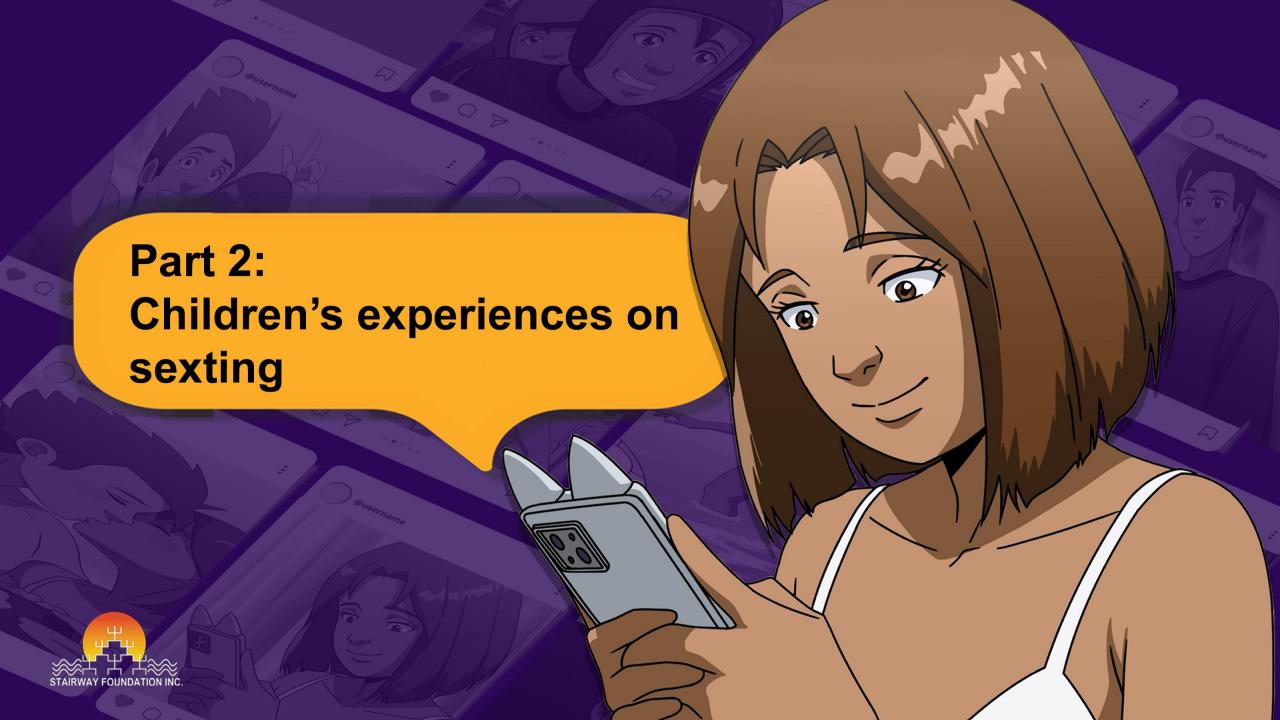

- 139 received an image/video showing private body parts
- 20 received an image/video showing private body parts from a boyfriend/girlfriend

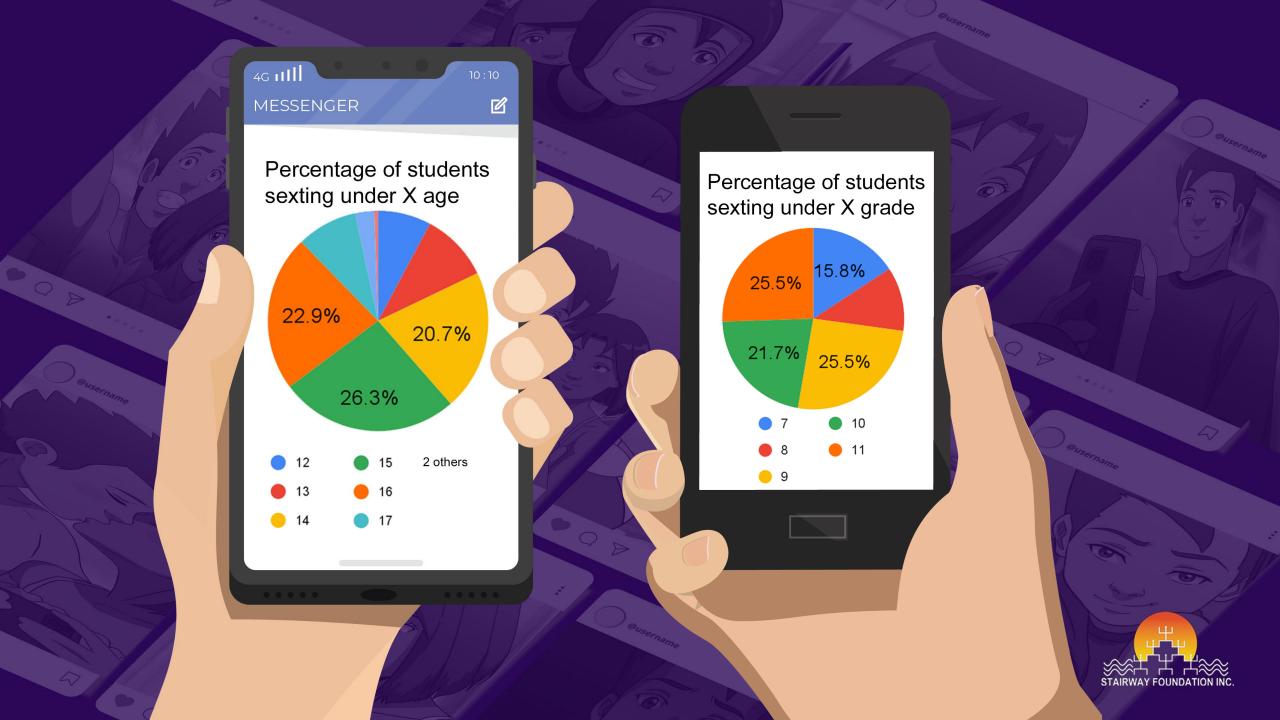

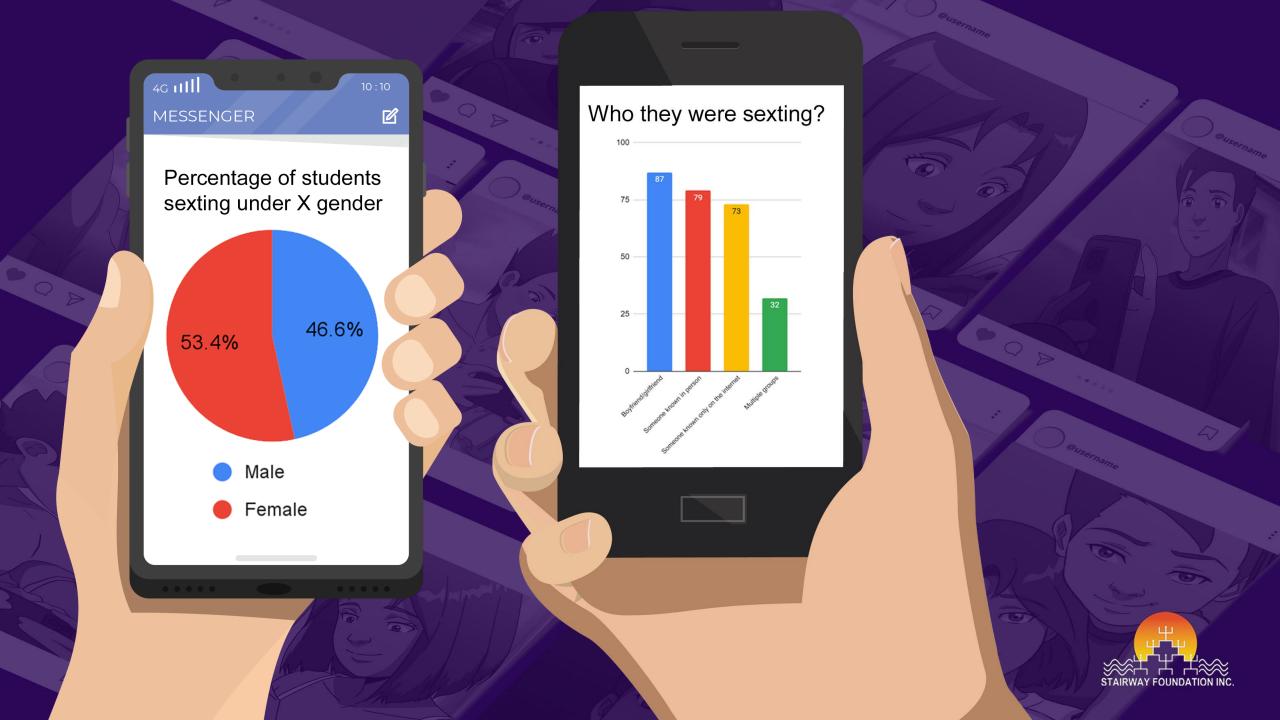

- 59 received an image/video showing private body parts from someone they know in person
 - 101 received an image/video showing private body parts from someone they only know in the internet

MESSENGER 10:10

From a survey of

1000 STUDENTS 23 students have been in a situation where someone threatened to make their sexual media contents public (sextortion)

9% (90) know a child who has been a victim of sextortion

Of these students, only 1/3 (33) indicated (to their knowledge) the incident was reported to appropriate and trusted persons (e.g. parents, teachers, social workers)
